

The logo for Axis Services Group, featuring the word "AXIS" in a bold, sans-serif font inside a dark grey oval, with a thin white line passing through it diagonally.

# AXIS

# Services Group

## LIFE CYCLE OF A PROJECT

Axis Services Group has established a reputation for delivering quality projects on time and within budget. The company provides a complete construction and maintenance service for hydraulic (civil and building), mechanical & fire pipe systems, water feature and irrigation projects.

On the right is a detail of how we partner throughout every stage of a project, from the design and engineering through to the budgeting, planning, construction, and maintenance of a site.

### 1.

#### DESIGN OF THE PROJECT

Early engagement with our client to identify the optimal value engineering design for the construction phase through to whole of life

### 2.

#### BUDGETS AND COST PLANNING

Working with our client and key supply partners to establish budgets, tendering and project planning

### 3.

#### CONSTRUCTION

Axis's highly motivated and skilled project and support teams deliver the project to exceed our client's and their client's expectations

### 4.

#### CLIENT OCCUPATION OF FACILITY

Axis provides detailed operating and maintenance instructions, as constructed drawings, asset lists and training to ensure a comprehensive and smooth handover of the services is achieved

### 5.

#### SITE MAINTAINED

Through its maintenance division Axis is focused on providing a comprehensive, professional and efficient service throughout the defects liability period and the life of the facility process and Axis' involvement
