- Quarterly Preventative Maintenance Procedures (Commercial Auditing)
- Disaster Recovery Services

PREVENTATIVE PLUMBING MAINTENANCE STRATEGIES

LEADING THE WAY WITH PAPERLESS REPORTING

AMS has invested in our future by providing our clients with one of the most sophisticated online Asset Management and reporting systems, AROFLO. You can keep track of all works performed to a particular asset as it builds an online history register. This helps you save money in the long term by reducing failure occurrences and selecting the correct asset replacement sequence.

AMS' POINT OF DIFFERENCE IS OUR ABILITY TO SERVE OUR CLIENTS ON A TRULY NATIONAL LEVEL

With offices around Australia, we are able to provide a consistent and seamless approach which is supported by the AMS brand, its management and its technicians. We further support this with the use of mobile technologies which give us a broader coverage to accommodate our client's needs, all day, every day.

AMS deliver quality repair services to all aspects of hydraulic services and general plumbing. We have service technicians available throughout Australia 24 hours per day, 365 days per year. Our maximum response time for repairs is two hours. Our clients say they prefer us because of our in-depth knowledge and experience in commercial diagnostics and repairs.
